

UC Davis Policy and Procedure Manual

Chapter 230, Sponsored Programs

Section 05, Individual Conflicts of Interest Involving Research

Date: 4/10/10, rev. 8/24/12

Supersedes: 6/16/08

Responsible Department: Office of Research

Source Document: University of California Policy on Disclosure of Financial Interests and Management of Conflicts of Interest Related to Sponsored Programs; Academic Personnel Manual Section APM-028, Disclosure of Financial Interest in Private Sponsors of Research

Exhibit A. Procedures for Reporting, Reviewing, and Managing Conflicts of Interest in Research

I. Purpose

This policy establishes standards and procedures to ensure that the design, conduct and reporting of sponsored research and educational activities will not be compromised by any conflicting financial interest on the part of the Principal Investigator(s) or other Investigators by implementing a system for the disclosure, evaluation, and management, reduction, and/or elimination of potential conflicts of interest. This policy complies with state disclosure requirements (Cal. Admin. Code, Title 2, § 18705) and federal regulations regarding objectivity in research (21 C.F.R. Part 54) [Policy Provisions covering Conflict of Interest for Investigators funded by Public Health Service \(PHS\) agencies are provided in Section 230-07, which covers federal regulations 42 C.F.R. Part 50 and 45 C.F.R. Part 94](#)).

II. Definitions

- A. Conflict of interest—a situation that occurs when the conduct of research could be compromised or appear to be compromised by a related financial interest of the Principal Investigator or other Investigators.
- B. Financial interest—includes any of the interests in a private sponsor of research defined by the [California Code of Regulations, Title 2, Section 18755](#) held by the principal investigator or the principal investigator's spouse, domestic partner and/or dependent children within the 12 months prior to the date of the offer of research funding.
- C. Investigator —any person, other than the principal investigator, who is responsible for the design, conduct or reporting of sponsored research or educational activities conducted in whole or in part at the University.
- D. Management plan—the written plan for the management, reduction or elimination of a potential or actual conflict of interest.
- E. Principal Investigator—the investigator primarily responsible for the design, conduct or reporting of sponsored research or educational activities conducted in whole or in part at the University.
- F. Research—a systematic experiment, study, evaluation, demonstration or survey designed to develop or contribute to general knowledge (basic research) or specific knowledge (applied research).
- G. Significant financial interest—anything of significant monetary value, including but not limited to salary or other payments for services; equity interests (e.g., stocks, stock options or other ownership interests); intellectual property rights (e.g., patents, copyrights and royalties from such rights); or holding a position as an officer, director, agent, or employee of a business entity. "Significant financial interest" includes such interests held by a Principal Investigator or other Investigators and by their spouses, domestic partners and/or dependent children.

For non-PHS funded Investigators, significant financial interest does NOT include:

1. Salary, royalties, or other remuneration from the University.
 2. Income from seminars, lectures, or teaching engagements sponsored by public or nonprofit entities.
 3. Income from service on advisory committees or review panels for public or nonprofit entities.
 4. An equity interest in a public company that represents less than a 5% ownership interest and less than \$10,000 in value as determined through reference to public prices.
 5. Annual salary, royalties or other payments from any source other than those referenced in subparagraphs (1) and (2) above that individually or when aggregated do not exceed \$10,000 over the next twelve months.
 6. Income from mutual funds and/or pension funds;
 7. A percentage of income received from the Veteran's Administration Medical Center as part of physician reimbursement for University faculty;
 8. Interest in a business entity if the business entity is an applicant for Phase I support under the Small Business Innovation Research (SBIR) Program.
- H. Small Business Innovation Research (SBIR) Program—the extramural research program for small businesses established by the awarding components of certain Federal agencies under Pub. L. 97-219, the Small Business Innovation Development Act, as amended. The term SBIR includes the Small Business Technology Transfer (STTR) Program, which was established by Pub. L. 102-564.

III. Policy

- A. When a research project is sponsored by a nongovernmental entity:
1. All principal investigators must disclose their financial interests in the sponsor of the research.
 2. If the project involves human subjects, Principal Investigator and other Investigators must disclose any significant financial interests related to the research project or that could reasonably appear to be affected by the sponsored research project.
- B. For research programs and educational activities sponsored by the federal government, University of California, and certain other entities (see [list](#)), Principal Investigator and other Investigators must disclose their significant financial interests that are related to the sponsored research project or educational activities or that could reasonably appear to be affected by the sponsored research project or educational activities (see also Section 230-07).
- C. When it is determined that a sponsored research project may reasonably appear to be affected by a financial interest disclosed pursuant to III.A or III.B, the University shall take steps to reduce, manage or eliminate the conflict to assure objectivity.
- D. Principal Investigator and other Investigators subject to financial interest disclosure requirements should broadly interpret disclosure criteria to ensure appropriate review of all potential conflicts. Such individuals are encouraged to consult with the Director—Research Compliance & Integrity regarding any questions about reporting obligations.

IV. Prohibited Activities

The following activities are prohibited because they present conflicts of interest that are contrary to the University's central mission:

A. Academic Freedom Restrictions

1. Investigators may not enter into secrecy or confidentiality agreements if the agreement:
 - a. Impacts the evaluation of a student, faculty member, or other employee.
 - b. Delays the protection of intellectual property rights or the fulfillment of degree requirements by more than the time contractually allowed for pre-publication review.
2. Investigators may not agree to arrangements that permit a sponsor to interfere in the scientific analysis or publication of research results or conclusions.
3. Professional evaluation of faculty, postdoctoral appointees, or staff, or academic evaluation of students may not be based upon participation in (or refusal to participate in) a Principal Investigator and other Investigators' outside activities as defined by APM 025.

B. Human Subjects Research

1. Principal Investigator and other Investigators involved in research with human subjects may not:
 - a. Directly or indirectly accept any gifts or payments from the sponsor of the research except for payments that are commensurate with their efforts on behalf of the sponsor.
 - b. Buy or sell common stock (as opposed to mutual funds) in the sponsor of the research until their involvement in the research ends and the results of the research are published or otherwise disseminated to the public.
2. Principal Investigator and other Investigators involved in research with human subjects may not perform clinical trials or testing on licensed-products for companies in which the University holds equity as part of a licensing-related transaction where the technology was developed at UC Davis, except as permitted in Business and Finance Bulletin G-44.

C. Intellectual Property

1. An employee who is involved in negotiating a license on behalf of the University may not have a significant financial or other interest in the business entity that is a party to the negotiations, except as permitted in Business and Finance Bulletin G-44.
2. An employee shall not accept a position on the board of directors of a licensee in which the University holds an equity interest, except as permitted in Business and Finance Bulletin G-44.

V. Requirements for the Disclosure of Financial Interests

- A. All Principal Investigators and other Investigators must disclose their financial interests and the interests of their spouses/domestic partners and dependent children on the appropriate disclosure form(s) as indicated in Exhibit A and Section 230-07 for PHS funded Investigators.
- B. All Principal Investigators and other Investigators involved in projects sponsored by the federal government must file an updated Form 800 (Statement of Economic Interests Related to Government Sponsored Programs and Other Projects Involving Human Subjects research) or a Form PHS 800 for PHS funded Investigators when they (or their spouses/domestic partners or dependent children) acquire a new financial interest related to a project, while the project is receiving financial support from federal government.

VI. Roles and Responsibilities

A. Conflict of Interest Committee

1. The Conflict of Interest Committee shall review the positive disclosures of financial interests from Principal Investigator and other Investigators to determine if a conflict of interest exists, and if so, how to manage, reduce, or eliminate the conflict as described in Exhibit A.
2. The Conflict of Interest Committee members are appointed by the Vice Chancellor—Research for three year terms.
3. The Committee shall be comprised of 11 voting members to include faculty members from the School of Medicine, the College of Agricultural and Environmental Sciences, the College of Engineering, the School of Veterinary Medicine, the College of Biological Sciences, and the College of Letters & Science, and one at-large member. The Committee shall have four non-voting, ex-officio participants including the Director—Sponsored Programs, the Director—Institutional Review Board, the Director—Research Compliance & Integrity, and the Campus Counsel. Other non-voting 'ad-hoc' participants may assist in discussions and decisions as needed.

4. Recusal

A committee member shall be recused from discussion and voting on a particular case if:

- a. The committee member has a compelling personal interest in the case (such as research or academic collaboration with the individual whose case is under consideration); or
- b. The committee member has a financial interest in the case under consideration.

B. Director—Research Compliance & Integrity

The Director—Research Compliance & Integrity is responsible for supporting the Conflict of Interest Committee, the individual monitors, and the Management Sub-Committees, ensuring that the Committees' decisions, recommended actions and reasons therefore are fully documented and implemented, and that the University complies with its obligations under state and federal law and this policy.

C. Director—Sponsored Programs

The Director—Sponsored Programs is responsible for ensuring that no federal funds are expended before the federal sponsor receives notification when it is determined that a conflict of interest exists.

D. Institutional Review Board (IRB)

1. The IRB will not approve any research involving human subjects where the Principal Investigator and other Investigators member has submitted a positive financial disclosure until the Conflict of Interest Committee reviews the disclosure and provides its recommendations to the IRB.
2. The IRB will review recommendations it receives from the Conflict of Interest Committee regarding the management, reduction or elimination of conflicts of interest to ensure that the recommended course of action will adequately protect study participants and the credibility of the human research protection program.

E. Principal Investigators are responsible for the following:

1. Disclosing financial interests as required by this policy and Exhibit A.

2. Ensuring disclosure by and other Investigators when required by this policy and Exhibit A.
 3. Complying with the provisions in Section F, below.
- F. Principal Investigator and other Investigators are responsible for the following:
1. Disclosing financial interests when required by this policy and Exhibit A.
 2. Upon request, preparing a statement for an individual monitor or management sub-committee regarding how they intend to manage, reduce, or eliminate a conflict when it is determined to be necessary by the Conflict of Interest Committee.
 3. Cooperating with the Conflict of Interest Committee and any monitor or management sub-committee in providing reports and documents as requested.
 4. Conducting the sponsored research or educational activity in a manner that will avoid a perception that the project could be influenced or biased by conflicts of interest.
 5. Fulfilling all conditions necessary to manage a conflict of interest as determined by the Conflict of Interest Committee, a monitor or management sub-committee, and in the case of research involving human subjects, the IRB.
- G. The Vice Chancellor—Research or his/her designee “Designated Official” is responsible for the following:
1. Review the recommendations received from the Conflict of Interest Committee and Institutional Review Board concerning the existence of a conflict of interest and any related recommended conditions and restrictions to manage, reduce or eliminate a conflict of interest.
 2. Determining whether a conflict of interest exists and, if so, what actions should be taken by the campus to manage, reduce, or eliminate the conflict.
 3. When a conflict of interest is found by the Designated Official involving PHS funding, the Designated Official shall report to the PHS awarding agency as required by PHS regulations (see Section 230-07).

VII. Records

A. Confidentiality

California State Form 700-U and Form PHS 800 is a public record. All other records and information provided by a Principal Investigator and other Investigators for the purpose of disclosure and management of a research conflict of interest and all official records of disclosure and management of a conflict of interest shall be considered personal information as described in Section 320-20. The unauthorized disclosure of any such information by an employee, except as required for official business purposes or by law, shall be grounds for discipline under Section 320-20.

B. Records Retention

Official records regarding individual conflicts of interest shall be maintained by the Office of Research and retained for 7 years after creation of the record, or for three years beyond the termination or completion of an award (and at least three years from the date of submission of the final expenditures report), or until resolution of an action by the sponsor involving the records, or as otherwise required by state and federal law, whichever period is longer.

VIII. Violations

- A. Failure to file disclosures or provide information required by this policy or to comply with any conditions or restrictions imposed by the Conflict of Interest Committee, a monitor, or management sub-committee constitute violations of this policy, which may be grounds for discipline pursuant to the appropriate University, state and federal policies.
- B. State and/or federal regulations may require reports to the project sponsor regarding violations of this policy. Project sponsors may impose additional sanctions including the suspension or termination of an award or debarment from receiving future awards.

IX. Further Information

Questions about this policy and the procedures should be directed to the Director—Research Compliance & Integrity in the Office of Research.
